EMPLOYMENT & PROJECT HISTORY

High Point Regional - UNC Health Care (Employer) 2007 - 2017 - Systems Architect

- Primary Lead in Systems management and administration for a large Regional Hospital, with emphasis on VMware ESXi administration and engineering, Citrix XenApp and XenServer administration and engineering. Additional primary responsibility for Red Hat Enterprise Linux, SuSE Linux, HP-UNIX, and Ubuntu Linux servers and support.
- Architect and lead system engineer VMware Horizon View for Single Sign-On Project using Imprivata SSO, as well as Red Hat Enterprise Linux, SuSE Linux, HP-UNIX, Ubuntu Linux, Citrix XenApp. System-wide responsibilities for VMware and Sharepoint management.
- Pioneered VMware ESXi server virtualization and brought VMware to High Point Regional.
- Project management and implementation for large, business critical projects.
- VMware Horizon View zero-client management, development of ThinApp virtual application system, technical lead for the Server Team on Clinical Single Sign-On VDI project, and pioneering VMware Horizon View usage.
- Responsible for internal Web-based applications, servers, and security of these servers.
- Primary architect for Citrix XenApp management, and design, in a critical, high availability up-time environment.
- Member of the Healthcare Information and Management Systems Society (HIMSS).

Independent Consulting - 2005 - 2007 - Independent Computer Consultant

- Provided cutting-edge consulting services for Open Source and Microsoft environments in the areas of System Engineering, data center design, VMware engineering, and Citrix Metaframe administration and development.
- Senior level project management for computer infrastructure systems, including planning, budgeting, and project implementation. Direction of other team members on projects.
- Designed E-commerce Web sites using Red Hat Enterprise Linux, Apache, MySQL and PHP (LAMP) and Microsoft Windows Server 2003/2008, Internet Information Server, and SQL Server database back end. Extensive BIND DNS management.
- Implemented infrastructure and network security for client companies: including warehouse automation and network and data center design. Provided automated reporting for numerous client needs.
- Web hosting and development, network security, server management for numerous clients.

Guilford County Information Services - 2005 - Webmaster (Former Employer)

- Webmaster for a large county government Web site, including design, maintenance and administration of all Web site related functions using both Microsoft Internet Information Server, and LAMP (Linux, Apache, MySQL, PHP.) Provided special project solutions to County Commissioners.
- Responsible for Web security, SSL certificates, and hardening of Web infrastructure.
- Responsible for system maintenance, up-time of computer systems, and exploring new technologies, including managing and leading the Content Management System Project.

Low Carb Nexus / Nexus Nutrition - 1999 - 2004 - Chief Executive Officer (Owner)

- Owner of an international business with sales in excess of \$890,000 per year
- Final responsibility for twelve employees of the company
- Two brick and mortar stores, a 5,000 foot warehouse, and an Internet Store
- Researched and implemented diverse technological solutions, responsible for our own computer infrastructure and security of systems based on LAMP (Linux-Apache-MySQL-PHP)
- Sold the business and web site in 2004

Center for Creative Leadership - 1998 - 2002 - Enterprise System Manager (Former Employer)

- Senior Technical Lead for research, planning, installation, and upgrades of system hardware and software at the Center's national and international locations (remote sites.)
- Designed and implemented a "thin client" environment using Citrix Metaframe to provide centrally served applications to a diverse client environment and mission critical applications over a corporate WAN and via a Web site interface using Citrix NFuse.
- As senior technical Enterprise System Manager - involved in budgeting, planning, and financial justification of all computer systems, projects, and upgrades, as well as overall Project Development for all corporate sites.
- Established technical direction and standards for all domestic and international corporate locations.

BizNetz, a Division of Sound-Ware, Inc. - 1996 - 1997 - Consultant (One year contract)

- Provided advanced system and Web security infrastructure for Internet backbone and Intranet via Microsoft Windows NT Server, Internet Information Server and Microsoft Exchange.
- Maintained and designed e-mail systems, groupware, and network connectivity.

Syngenta Corporation (Formerly CIBA-GEIGY Corporation) - 1990 - 1996 - Internet and Electronic Messaging Consultant (Former Employer)

- Researched, planned, and implemented the Electronic Mail backbone for all North American business units on Microsoft Windows NT Server Systems for the Cibamail Network (60,000 mailboxes).
- Managed second-level support for over 10,000 users in the business units at remote sites.
- Developed training courses and documentation, and conducted training sessions, on the World Wide Web and Internet technology, as well as Electronic Messaging.

NC Agricultural & Technical State University - 1988 - 1990 - System Manager (Former Employer)

- Managed Digital VAX/VMS systems in a four node, mixed, heterogeneous VAXcluster.
- Supervised Computer Systems personnel, directing projects and work assignments.
- Developed the Operations Manual and System Disaster Plan for the Computer Center.
- Pioneered A&T University's VAX-based connection to the Internet.
- Provided Digital ALL-IN-1 Office Automation including Word Processing and Electronic Mail for the senior administrative staff.
